

CheckMark 1099 Software – 2025 Year Quick Start Guide

Congratulations on your purchase of CheckMark 1099 Software!

This *Quick Start Guide* provides basic information to help you get started. More detailed information with screen shots can be found in the PDF version of the User Manual under the **Help** menu in the program.

Macintosh Download Location

The default install location on the hard drive for CheckMark 1099 is: *Macintosh
HD\Applications\CheckMark\1099*(year)

We don't recommend you install this anywhere other than your local hard drive.

Windows Download Location

The default install location on the hard drive for CheckMark 1099 is:
C:\ProgramFiles\CheckMark\1099(year)

We don't recommend you install this anywhere other than your local hard drive.

Open the CheckMark 1099 Application

You can use either the shortcut or alias that was created or go to the CheckMark folder that was installed and double-click the CheckMark 1099 application.

In order to run, CheckMark 1099 needs a place to save 1099 information. Please choose a directory on this computer's local hard drive in which to save the necessary data files.

Using the default directory is recommended.

You can change the location of this directory at any time by selecting 'Change Data Location' from the Tools menu, but it is recommended that you do not change this directory once set.

Detailed instructions are located in the 1099 Manual located under the Help menu in the program.
